

# ECHOCARDIOGRAPHY - BS

A degree from St. Kate's will give students the best possible professional preparation for a satisfying, rewarding, and successful career in sonography. St. Kate's specializes in educating healthcare professionals - we've been leading the way since 1905. St. Kate's has an outstanding reputation in the healthcare community as the metro area's leading healthcare educator - and an extensive clinical network where students will gain training in real-world conditions.

Sonographers have extensive, direct patient contact that may include assisting with some invasive procedures. They must be able to interact compassionately and effectively with people who range from healthy to critically ill.

Cardiac sonographers use ultrasound to examine the heart's chambers, walls, valves, and vessels. The sonographer uses sophisticated diagnostic ultrasound imaging machines and transducers which use high-frequency sound waves to produce high quality images that are assessed by a Cardiologist (physician) to aid in the diagnosis of the patient.

A typical day includes reviewing the patient's history, performing the echo examination along with blood pressures, and presenting the echo findings to the physician and other allied health staff. Sonographers in this field work with healthy and critically ill inpatients and outpatients of all ages in predominantly non-invasive procedures.

A cardiac sonographer must be organized and able to function independently. They must possess strong human relations and communication skills, be able to cope with high-stress situations, and have the ability to accurately document patient information.

The program is four years in length. Students following this track will begin as pre-sonography majors in which they will complete two years of liberal arts and science courses. Following completion of prerequisite and core requirements students will apply to the sonography major and upon acceptance will start required sonography courses to be taken remaining two years. St. Catherine University offers a rigorous and comprehensive academic program that can give you credentials and knowledge you can use to work towards becoming a leader in your field.

Clinical experience is a vital part of the program. We offer clinical experiences located both in and outside the Twin City Metro area as well as out of state locations. These experiences allow students to work alongside experts in the field and practice cardiac sonography in a wide range of medical situations.

Upon completion of the program, graduates are awarded a Bachelor of Science in Echocardiography and are eligible to take the national registry exams in sonography principles and instrumentation (SPI) and Adult Echocardiography.

St Catherine University Sonography Echocardiography Track is accredited by the Commission on Accreditation of Allied Health Education Programs ([www.caahep.org](http://www.caahep.org) (<http://www.caahep.org>)) upon the recommendation of the Joint Review Committee on Education in Diagnostic Medical Sonography (JRC-DMS).

Commission on Accreditation of Allied Health Education Programs

## Acceptance to Major

Admission to the sonography echocardiography track major is expected to be competitive. Students will be considered for admission in two groups:

1. Select students are admitted to the guaranteed admission program (GAP) each year. Students who apply on or before February 15 of their senior year will be given priority registration to the GAP program.
2. To be eligible to apply to the sonography major students must meet the following minimum requirements outlined below. First-year, transfer, and second major students will be considered in one pool, and admission is contingent upon the number of positions available.

- Prerequisite GPA of 3.0 or above
- Overall cumulative GPA of 3.0 or above
- Successful completion of all prerequisite courses with a grade of a C or above<sup>1</sup>
- Only one prerequisite has been retaken, for any reason, within the last 5 years
- No more than one prerequisite earned a grade lower than or a "C" or "W"
- No prerequisite course may be taken "Satisfactory/Unsatisfactory"
- Meet the technical standards below
- Completion of a certified nursing assistant (CNA) course (or an alternative patient care course approved by the program director).

<sup>1</sup>Students are strongly advised to complete college algebra, BIOL 2610 (<https://catalog.stkate.edu/search/?P=BIOL%202610>) Human Anatomy and Physiology I with Lab, and BIOL 2620 (<https://catalog.stkate.edu/search/?P=BIOL%202620>) Human Anatomy and Physiology II with Lab no more than five years prior to entering St. Kate's. Prospective students are advised to contact their admissions counselor for more information. Enrolled students are advised to contact the sonography department program director for more information

## Technical Standards

Students accepted into the Diagnostic Medical Sonography program must meet specific technical standards fundamental for successful and competent performance in sonography as determined by the essential functions performed by sonographers in practice.

Entrance and progression in the Diagnostic Medical Sonography program require the following physical, mental, and emotional/psychological attributes and communication skills. It should be noted that, under the Americans with Disabilities Act, "A qualified person with a disability is one who can perform the essential function of a job with or without reasonable accommodation." Please read the standards carefully and seek clarification if necessary. According to the nature of the work required in Sonography, the student must be able to meet the following standards:

## Physical Attributes:

- Must have discriminating visual capabilities for proper evaluation of the patient and ultrasound image consistent with the abilities to assess asymmetry, discreet tissue texture changes, and color distinctions under dimmed lighting.

- Must be able to distinguish audible sounds to hear information crucial for an appropriate response essential for the safe, effective care and treatment of patients.
- Must be free from health or medical disorders that limit the physical ability to perform, completely and efficiently the duties of a sonographer without risk to self or others.
- Must have manual ambidexterity and adeptness to coordinate the hands and eyes for manipulation of sonographic equipment controls, keyboard, and monitor while performing a procedure.
- Must have the physical stamina to complete the required course of didactic and clinical study according to established procedures and standards of speed and accuracy. Long periods of sitting, standing, or moving are required in the classroom, laboratory, and clinical settings.
- Must have the strength and mobility required for activities associated with daily practice, emergencies, and with invasive sterile procedures.

#### **Mental Attributes:**

- Must possess the ability to think in the abstract, specifically, to be able to comprehend three-dimensional relationships and understand the spatial relationships of structures.
- Must possess and utilize the mental ability to apply previously learned knowledge. Application of this knowledge includes the ability to measure, calculate, rationalize, analyze, integrate, and synthesize in a timely fashion according to established procedures and standards of speed and accuracy.
- Must make appropriate judgment decisions in routine and emergencies, and situations not clearly governed by specific guidelines.
- Must be free from health or medical disorders that limit the ability to perform, completely and efficiently, the duties of a sonographer without risk to self or others.

#### **Emotional/Psychological Attributes:**

- Must possess the emotional health and stability required for the full utilization of their intellectual abilities, for the exercise of good judgment, and for the prompt completion of all responsibilities attendant to the diagnosis and care of patients without risk to self or others.
- Must be able to tolerate mentally, and emotionally taxing workloads and function effectively under stress.
- Must be able to display flexibility, versatility, dependability, diplomacy, compassion, integrity, motivation, and interpersonal and professional skills at all times in the clinical and didactic setting.
- Must be free from health or medical disorders that limit the emotional/psychological ability to perform, completely and efficiently, the duties of a sonographer.

#### **Communication Attributes:**

- Must show evidence of effective and appropriate written and verbal English communication skills throughout the program to all persons in both the academic setting and the clinical health care setting. Communication includes speech, reading, writing, and non-verbal behavior and actions.
- Must have the ability to relate information to and receive information from patients in an accurate, empathetic, ethical, and confidential manner.

- Must be able to understand and convey information essential for the safe and effective care of patients in a clear, unambiguous, and rapid fashion in emergencies.

#### **Professional responsibilities include, but are not limited, to:**

- Obtain and record an accurate patient history
- Perform diagnostic procedures and obtain diagnostic images
- Analyze technical information
- Use independent judgment in recognizing the need to extend the scope of the procedure according to the diagnostic findings
- Provide an oral or written summary of the technical findings to the physician for medical diagnosis
- Provide quality patient care
- Collaborate with physicians and other members of the healthcare team.

Sonographers must also be knowledgeable about and limit the risk of possible exposure to blood and body fluids. Many sonographers also assist in electronic and clerical scheduling, record keeping, and computerized image archiving. Sonographers may also have managerial or supervisory responsibilities.

The technical standards as stated here reflect performance abilities that are necessary for a student to successfully complete the requirements of the Medical Sonography curriculum:

- Sitting 2 hours per day or less
- Must have touch sensation
- Stand up to 80% of the day
- Must have manual dexterity
- Walk 4-6 hours per day
- Must be able to grasp
- Routinely reach
- Must be able to push a patient and machine
- Must be able to routinely bend
- Must be able to routinely stoop
- Must have a visual and hearing ability
- Must be able to crouch and kneel
- Must be able to speak clearly
- Must have the ability to work long hours
- Must be able to assist patients on/off an examining table
- Must have full use of both hands, wrists, and shoulders
- Must be able to routinely lift more than 50 pounds
- Must be able to transfer patients to and from a wheelchair, stretcher, or bed
- Must be able to move/transfer and skillfully position patients weighing up to 400 pounds
- Must have the ability to push, pull, and manipulate a mobile ultrasound machine for bedside examinations
- Must be able to adequately view ultrasounds, including color distinctions

This major is offered in the College for Women only.

## Curriculum

Code	Title	Credits
<b>Required Courses <sup>1</sup></b>		
SON 1620	Cardiac Anatomy and Physiology	4
SON 1630	Foundations of Echocardiography	4
SON 1642	Echo Foundations Scan Lab	2
SON 2015	Ultrasound Physics and Instrumentation	4
SON 2100	Adult Echo	4
SON 2122	Adult Echo Scan Lab	2
SON 2455	Congenital Heart Disease	2
SON 2460	Concepts in Echocardiography	4
SON 2510	Adult Echo 2	2
SON 2710	Adult Echo III	1
SON 3360	Echo Clinical Practicum I	6
SON 3415	Comprehensive Review Lab	1
SON 3426	Echo Clinical Practicum II	6
SON 3436	Echo Clinical Practicum III	6
SON 4020	Seminar in Advanced Echo Imaging	2
<b>Total Credits</b>		<b>50</b>

Code	Title	Credits
<b>Prerequisite courses <sup>1</sup></b>		
BIOL 2610	Human Anatomy and Physiology I with Lab <sup>2</sup>	4
BIOL 2620	Human Anatomy and Physiology II with Lab <sup>2</sup>	4
IPE 1030	Healthcare Teams Foundations and Medical Terminology	2
IPE 1040	Healthcare Teams and Quality Outcomes	2
PHYS 1050	Conceptual Physics (OR PHYS 1080 and PHYS 1090, OR PHYS 1110 and PHYS 1120)	4
SON 1500	Communication for the Sonography Professional	2
College level algebra/statistics or higher <sup>2</sup>		4
<b>Total Credits</b>		<b>22</b>

Code	Title	Credits
<b>Required supporting courses <sup>1</sup></b>		
COMM 1030	Speaking to Lead and Influence	4
IPE 4200W	Healthcare Teams - Evidence-Based Practice	4
MGMT 3460	Managing Within a Diverse Workforce	4
PHIL 3400	Biomedical Ethics	4
<b>Total Credits</b>		<b>16</b>

<sup>1</sup> Minimum grade of C required

<sup>2</sup> Students are strongly advised to complete college algebra, BIOL 2610 and BIOL 2620 no more than five years prior to entering St. Kate's.

The Reflective Woman, CORE 3990W Global Search for Justice, and another writing-intensive course in another department).

Code	Title	Credits
<b>First Year Fall Term</b>		
Select one from:		4
ECON 1090	Statistical Analysis for Decision Making	
HLTH 1090	Biostatistics	
PSYC 1090	Statistical Methods in Psychology	
STAT 1090	Statistical Analysis	
<b>First Year Spring Term</b>
