

PUBLIC POLICY - BS

The Public Policy major equips students with the interdisciplinary knowledge and applied skills to address today's most urgent social and political challenges. Combining coursework in economics, political science, statistics, and sociology, the program prepares students to evaluate public problems, design effective policies, and communicate solutions clearly and persuasively.

Rooted in St. Kate's mission to educate women to lead and influence, the major is designed for students seeking careers in government, advocacy organizations, nonprofits, NGOs, and elected office. Graduates emerge with a versatile toolkit that includes quantitative analysis, policy writing, critical thinking, and a deep understanding of structural inequality.

Students learn to navigate the political and economic forces that shape public policy, while building technical competencies in policy analysis, data interpretation, cost-benefit evaluation, and data visualization needed for today's policy analyst roles. The coursework encourages students to pursue relevant policy topics that spark personal interest through research and other applied work, which are attractive discussion points for interviews and graduate school applications. A strong emphasis is placed on justice, equity, and women's leadership in policymaking, ensuring students are prepared not only to work in the field but to lead it.

Students gain hands-on experience through internships and collaborative research with faculty, working on topics such as education policy, criminal justice reform, and international development. Many students present their work at national conferences such as the Population Association of America (PAA) and the National Conference on Undergraduate Research (NCUR). Internship placements have included the Minnesota Legislature, American Red Cross, Ramsey County, and the Minnesota Department of Transportation.

Through its blend of liberal arts education and professional training, the Public Policy major prepares students to make an immediate impact—and a long-term difference—in public life.

This major is offered in the College for Women only.

This major is offered in the College for Women only.

Code	Title	Credits
Major Courses:		
ECON 1120	Economics of Social Issues	4
